

Humanities and Social Sciences

Economics

The principal aim of this subject is to provide students with some basic techniques of economics analysis to understand the economic processes with particular reference to the economics of firm and industry. The determination of prices in different markets, structure of the modern industrial economy, economic aspects of individual behaviour factors affecting resource rewards, the role of monetary institutions and the basic concept of National Income accounting will be covered during the semester. Where appropriate, reference to the Indian Economy will be made.
