

TIRUPATI

INDIAN INSTITUTE OF TECHNOLOGY TIRUPATI
भारतीय प्रौद्योगिकी संस्थान तिरुपति
Yerpedu-Venkatagiri Road, Yerpedu Post, Tirupati District, Andhra Pradesh - 517619

| 1. | Title of the course | Engineering Thermodynamics |
| :--- | :--- | :--- |
| 2. | Course number | ME209L |
| 3. | Structure of credits (L-T-P-C) | $2-1-0-3$ |
| 4. | New course/modification to | Modified with ME201L/THERMODYNAMICS |
| 5. | To be offered by | Mechanical Engineering |
| 6. | Prerequisite | None |
| 7. | Course Objective(s): To discuss the laws of thermodynamics, concepts of irreversibility, entropy and <br> their significance. To apply the concepts of thermodynamics to engineering problems. |  |
| 8. | Course Content: Concepts of thermodynamics: system, control volume, property, state and process, <br> exact and inexact differentials; Work: thermodynamic definition of work, displacement work, path <br> dependence of displacement work; Zeroth law; Heat: definition, examples of heat/work interaction in <br> systems; Pure substance: two property rule, properties of water-steam system, definitions of saturated <br> states, P-v-T surface, use of steam tables, saturation tables, superheated tables, identification of states <br> and determination of properties; First law: cyclic and non-cyclic processes, concept of total energy, first <br> law for flow processes, derivation of general energy equation for a control volume, steady flow <br> processes, unsteady processes; Second law: Kelvin-Planck and Clausius statements, definition of <br> reversible process, internal and external irreversibilities, Carnot cycle, absolute temperature scale; <br> Entropy: Clausius inequality, definition of entropy, demonstration that entropy is a property, evaluation of <br> entropy change for solids, liquids, and ideal gases undergoing various processes, available and <br> unavailable energy. |  |
| 9. | Textbook(s): <br> 1. Cengel YA and Boles M A, Thermodynamics: An Engineering Approach, 9th Edition, McGraw Hill <br> (2019) |  |
| 10. | Reference(s): <br> 1. Moran M J, Shapiro H N, Boettner D D and Bailey M B, Principles of Engineering Thermodynamics, <br> 8th Edition, John Wiley (2015) |  |
